

AMENDMENTS TO THE CLAIMS

In response to the Office Action identified above, please amend the above-identified application as follows:

5

1. (Currently Amended): A pointing device comprising:

a housing;

a button installed on the housing for generating button signals;

10 a displacement signal generator installed in the housing for generating displacement signals; and

an input panel installed on a top side of the housing for inputting handwriting input, the input panel being positioned on the housing other than the position of

15 the button;

wherein the handwriting input inputted to the input panel will be transmitted to a computer to perform an identification process.

20 2. (Original): The pointing device of claim 1 being a mouse.

3. (Original): The pointing device of claim 2 wherein the displacement signal generator comprises a roller installed at bottom of the housing for generating displacement
25 signals.

4. (Original): The pointing device of claim 1 wherein the displacement signal generator comprises a track ball installed at a top end of the housing for generating displacement signals.

5

5. (Cancelled)

6. (New): A pointing device comprising:

a housing;

- 10 a displacement signal generator installed in the housing
for generating displacement signals; and
an input panel installed on the housing for inputting text
data by working with word-processing software;
wherein the text data inputted to the input panel will be
15 transmitted to a computer.
